

What is **PHYSICAL THERAPY**

Physical Therapy may be provided as in-home care by Licensed Physical Therapist or Licensed Physical Therapy Assistants. Physical Therapy assists with Gross Motor Skills, such as:

Ambulation

Walking or ability to move about.

Musculoskeletal Disorders

Including Back Pain, Injuries, or congenital disorders

Neurological Conditions

Strokes, Spinal Cord Injuries, Cerebral Palsy, Multiple Sclerosis and Genetic Disorders.

Injuries and Post Surgical Rehabilitation

Concussions, torn rotator cuffs, hip or joint-replacements, back surgery, carpal tunnel syndrome, tennis elbow and TMJ

Exercise, Strengthening and Balance

Vertigo, Generalized Weakness, Failure to Thrive, Atrophy due to ALS, Guillain-Barre Syndrome, Arthritis, neuropathy or MS.
